TATA CONSULTANCY SERVICES LIMITED

Tata Consultancy Services Limited is an Indian multinational information technology service, consulting and business solutions company. I am working for last 6 years, currently as IT Analyst in Kolkata location. My main responsibilities are consulting with clients, determining business needs, ensuring system security, collaborating with other organization, designing and developing automated & integrated business solutions on Business to Business Integration (B2B) platform and Enterprise Application Integration on multitier platform including Legacy as well as standard ERP Solution, application upgradation, testing systems, and monitoring real time transactions & performance.

My main responsibilities are-

> Understanding requirements from clients, documenting them properly.
> Designing B2B Integration Solution, Enterprise Application Integration Architecture and developing POCs.
> Functional and Technical design documentation.
> Learning and implementing EDI Standard transactional real-time application after analyzing the actual scope of work.
> Process improvement and automation analysis.
> Integration trends and futuristic solution approach analysis.
> New Trading partner onboarding, new business flow development.
> Developing and fixing GIS maps, BPs, FTPs etc.
> Inter organizational modules data flow designing through TIBCO.
> Real time transactional data monitoring and performance improvement.
> Software and hardware upgradation, vulnerability remediation.
> Functional ERP business modules data flow monitoring as per organizational policy (Order to Cash, Procure to Pay).
> Proactively monitoring the highest levels of systems and infrastructure availability.
> Customer orientation - Identifying new opportunities, scopes and overall revenue.
> Custom report generation as per organizational requirements.
> Fostering team spirit, regular discussion, mentoring, cohesive execution of activities to achieve team goals.
> Vendor management and ensuring customer's satisfaction.
