TECHNO - FUNCTIONAL INTERN

Tata Consultancy Services | Tata Motors | Apr 2013 - Aug 2013

- Create the demo UI for the understanding in the early stage of the project using Balsemic Tool.
- Creating multiple documents like Test Cases, MoM, Procurement Logic, Code Review, Technical Specification, Error Logs etc.
- Looked into the whole process of SRM.
- Worked on the UAT and completed the Go-Live.

COMPLEX OBJECTS

- Created an interactive report holding dynamic display of the ALV with different functionalities on it like aggregation and colour scheme on the dynamic columns.
- Prepared the nested custom Function Modules within a report to pass on the values to the standard structure in order to implement the business requirement.
- Implemented the interactive report using OOP concepts which sends an Email using FM and holds a colourful and aligned attachment using transformation XML coding within the ABAP report.
- Worked on complex BTE and application log business requirement.
- In order to implement the business requirement on simultaneously creating the GR receipt and confirming the good movement as well, got it solved by the update FM.
- Used the RF menu concept of tcode LM01 in the custom module pool report to do the bin to bin transfer, creating the IDOC & TO using standard FM.
- Worked on interactive Adobe Form for quality notification using BAPI to fetch the data for tcode QM03 including private notes.

EDUCATION

BACHELOR OF ENGINEERING (INFORMATION TECHNOLOGY)

Mumbai University | 2008 - 2012

Aggregate 65.5%

ACHIEVEMENTS

- Completed my development module much before the deadline enabling early GO-LIVE.
- Awarded for the Best project team of the quarter as we had completed within time and had the minimal hypercare tickets.
- Created white papers on new technology like SAP FIORI, HANA modelling concepts.
