Database	Oracle 10g, Microsoft SQL Server
Product/Tools	IBM Rational Software Architect, IBM Clear Case, SVN, SoapUI, Hudson, Maven, GIT, Bitbucket, Teamcity
Server	WebSphere application server v8.5, Tomcat

PROJECT EXPERIENCE:

PROJECT TITLE: New Savings Enquiry(NSE)

CLIENT: A Leading UK Based Bank

ROLE: Developer

DURATION: April 2016 to till Date

PROJECT DESCRIPTION: New Savings Enquiry(NSE), was delivered to provide a staff member a facility for Account Enquiries. A member of branch staff can select the “Savings Account Enquiry” link from the branch platform menu after which they are redirected to new screens (NSE home page).

PROJECT TITLE: Reference Data Management & Optimization of API Calls

CLIENT: A Leading UK Based Bank

ROLE: Developer

DURATION: January 2016 to till April 2016

PROJECT DESCRIPTION:

Project deals with storing country code formats of different standards such as ISO, IRS, etc and create a mapping between the standards. One of the largest Bank in US which provides services to customers across the globe.

Internal applications of bank were using different standards instead of generic standard and faced challenges while communicating to other applications. We have created a master database in DB2 tables which contains all standards and APIs were coded in Java to load the data, to extract the data and to create mapping files across standards.

KEY RESPONSIBILITIES HANDLED:

- Created Various Web Service APIs like Retrieve Schemes, Record Relations, Record & Modify Mapping using Java Technology in Rapid Application Development (RAD).
- Written Unit Test scripts to test the functionality using XML through SOAP UI for various Environments like DEV, SIT and TT.
- Checking application, request and response logs through HPSA.
- Contact testing team on daily basis and fixing the issues raised by them in Quality Center.
- Preparation of Test Data and Test Case Execution.
- Track of daily production report.

PROJECT TITLE: WAS upgrade

CLIENT: A Leading UK Based Bank

ROLE: Developer

DURATION: November 2015 to January 2016

PROJECT DESCRIPTION:

WebSphere is an IBM middleware tool that allows applications to interface with the user through the internet. Many key applications have their web components running under WebSphere and such is a critical infrastructure component for key RBS customer services. This project involves migrating the identified applications to the latest WebSphere build and

to remediate the significant operational risk exposure of running out-of-support and extended support version under group operational risks.

KEY RESPONSIBILITIES HANDLED:

- Migration of WebSphere application from 5.1 to 8.5.
- Creation of SOAP based web service.
- Migration of JAX-RPC to JAX-WS
- Migration of JDK1.5 to JDK1.7
- Impact analysis on migrating the CTG connector to Web service.
- Worked on new enhancements and defect fixes that are integrated for new release.
- Analyzing the defects raised during SIT phase and providing relevant updates.
- Handled unit testing for the applications owned and involved in client reviews, walkthrough of the test case documents.
- Responsible for the developing, maintaining and handling the product.
- Worked with clients to define and capture user needs.
- Analyze and fully understand project requirements to formulate and implement programmatic solutions that efficiently and effectively addressed the requirements.

TOOLS DEVELOPED:

Developed an automation tool in Java to convert a files placed in a folder from source format to TIFF format and place it in another folder with business requirement validation. It will run as service and running successfully in client environment.

AWARDS & ACHEIVEMENTS:

Got Insta Awards from *Infosys Ltd* for undertaking Combine Separate Initiative where I have been very proactive in taking responsibilities and also tracking the issues and taken to the closure

PERSONAL PROFILE:

- Name: Rajkumar K
- Mother`s Name: Gomathi K
- Father`s Name: Kondalraj K
- Date of Birth: 18.01.1993
- Languages Known: Tamil, English.

DECLARATION:
