

SREENIVAS RAMANATHAN

+91 9790757625 | rsreenivas19@gmail.com | Chennai

PROFILE SUMMARY

- Around 5.8 years of working experience in Software development and testing.
- Played key roles in the Design, Development, Implementation stages of projects and testing for the same.
- Worked extensively on Data stage, Oracle SQL, UNIX, JIRA and ALM.
- Having cognition in test strategies, methodologies and the software development life cycle.
- Owns good grip on agile/scrum practices, workflow diagrams like MSVisio, Magic Draw.
- Possess good problem solving skills as developer, a good team player and act as good motivator.
- Willing to learn new tools and technologies.

OBJECTIVE

To work in professionally managed and dynamic organization, which provides growth oriented position and opportunities to contribute towards the success of organization.

KEY COMPETENCIES

RDBMS	- Oracle 11g
Languages	- SQL ,Unix
ETL Tools	- Data stage 9.1
Test Management Tool	- HP Quality Center/ALM
Reporting Tools	- Business Objects XI R2
Environment	- Windows XP/7/8.1/10
	-
Certifications	- TSCL Certified Data stage developer

RELEVANT EXPERIENCE

Oct,2014- PRESENT **Tata Consultancy Services, Chennai**

DATASTAGE DEVELOPER

- Analyze the requirement & prepare requirement analysis & design document.
- Interacting with Clients, BA for requirements gathering during Agile calls.
- Design and developed ETL jobs using various stages in parallel jobs using Designer.
- Extracting data from sources like oracle database and flat files and transforming them using business logic and loading the

data to the business tables.

- Extensively used processing stages like sort, aggregator, transformer Stages in developing jobs.
- Extensively update the status instantly in JIRA as working in agile methodology.
- Performing unit testing on the jobs developed.
- Preparing the Test Case Document and capturing the test results.
- Preparing automated unit test scripts to ensure quality deliverables.

Feb,2013 – Oct,2014

Tata Consultancy Services, Chennai

TESTING ANALYST

- Analyze the requirement & providing the test estimation and scheduling.
- Performed a discussion with the test manager regarding the efforts, requirements and issues if any.
- Prepare test case design document based on the functional requirement.
- Ensured that designed document had covered all the requirements.
- Uploading the same to QC/ALM for providing the results during validation.
- Performing the execution using Teradata SQL queries by comparing the data between the DWH tables.
- Later perform the testing using QTP.
- Ensured that performing the End to End testing by getting the front end screenshots and validated against DWH end.
- Fixing bugs and resolving the issues.
- Ensure overall quality of all the deliverable in both SIT/UAT
- Involved In the automation perspective through UNIX commands and got the credit for reduced the test cycle time.

ACADEMIC QUALIFICATIONS

B.E- ELECTRICAL AND ELECTRONICS ENGINEERING Sethu Institute of Technology, Virudhungan	2008-2012	8.26 CGPA
12 TH –HSC Sri Aurobindo Mira Matric Hr.Sec.School, Madurai	2007-2008	88.16 %
10 TH –MATRICULATION Rajan Matriculation School, Madurai	2005-2006	82%

KEY PROJECTS

Tata Consultancy Services

Lloyds Banking Group-Risk Data Warehouse-Group Risk System

Environment: IBM-Info sphere Data Stage -9.1 Oracle 11g, UNIX.

- Analyze the requirement & prepare requirement analysis & design document.
- Involved in functional level clarifications with user from LBG.
- Designed Data stage Jobs to process source tables into DWH environment.
- Actively updating every task status in JIRA as the issues have to be sorted out instantly which shows the agile methodology
- Involved in defect analysis highlighted by testing team during the testing phases like SIT, UAT and Prod.
- Actively incorporated the change request during the level of testing provided by business and successfully delivered the required business to the client.

Tata Consultancy Services

CITI Bank-Enterprise Data Warehouse

Environment: Teradata, RTC, HP Quality center (ALM), QTP, UNIX.

- Analyze the requirement & prepare the estimation, test case design document.
- Involved in functional level clarifications with user from APAC, EMEA and LATAM region.
- Performed the validation using DB tool like Oracle to ensure the quality of data had been flew from Host files into DWH environment.

AWARDS & RECOGNITION

- Won Award for Outstanding (Star of the month).
- Won Award for Excellence (On the Spot).

ADDITIONAL COMPETENCIES

- Owns a good Knowledge in Big Data hadoop Concepts.
