	<ul> <li>Experience in handling Tracks, Snapshot Activation and De-Activation, Instance - Migration Termination, Resume &amp; Suspend Process.</li> </ul>			
	<ul> <li>Knowledge of industry best practices in Lombardi and contributed in code reviews for difference BPM application to improve the performance.</li> </ul>			
	√ Expertise in developing Java Web Projects.			
	√ Able to lead a team and manage Project Life Cycle.			
	√ Training and mentoring juniors.			
	<ul> <li>Handled support activities for UAT, Pre Production, Production and Post Production environments.</li> </ul>			
Current	Tech Mahindra Limited (Oct 2017-till date)			
Employer Previous	Mindcraft Software Private Limited (Jan 2017-Oct 2017).			
Employer	Datamatics Global Services Limited (Jan 2015 – Jan-2017). Arzoo.com India Private Limited. (Apr 2011 - Dec 2014).			
Designation	Associate Tech Specialist			

Key Skills			
IBM BPM Development	IBM BPM Management	Websphere ODM	Java J2EE
IBM BPM 8.5.x. Coach Views. Human Services. Under Cover Agent. Dashboards. Integration Services. AJAX Services. Oracle SQL programming.	Managing User & Group Accounts. Event Managers. EPV's. Process Monitors. Saved Search Admin. Handling Tracks. Snapshot Activation and DeActivation.	Business Object Modeling. Executable Object Modeling. Integration with IBM BPM. Rule Execution Server. Developing ,Deploying and Testing.	Core Java. JSP. Servlet. Struts 1.3. Web-Services Integration

Engagement Overview			
Project Name	SEBI Implementation		
Client	Securities and Exchange Board of India		
Duration	Oct 2017 – till date		
Team Size	5		
Project Description	SEBI Implementation is a project for automation of business workflow for SEBI Employees.Role of BPM in this project was an enhancement to the existing DMS System existing in SEBI.		
Contribution	√ Communicate with client for understanding of requirement as well as changes.		
	<ul> <li>✓ Convey Production issues to the off-shore team and get the issues resolved.</li> <li>✓ Production Deployments and BPM Monitoring.</li> <li>✓ Provide Production Support to the Client for issues and Change Requests.</li> </ul>		
Project Name	BSLI APIM.		
Client	Birla Sun Life Insurance		
Duration	Feb 2017 – Oct 2017		
Team Size	4		
Project Description	BSLI APIM is an insurance domain project in which all BSLI API's are exposed to the outside world where customers can directly opt for the required insurance policy. Project consist of various IBM technologies like IBM BPM, IBM API Manager, IBM Datapower.		
Contribution	<ul> <li>✓ Leading the team upfront and making sure the deliverables.</li> </ul>		

Communicate with client for understanding of requirement as well as changes.					
making sure of bug free execution and delivering the products.  - V UAT Deployment and testing.  Project Name  Eximbilis Trade Finance System.  Emirates National Bank of Dubai (Dubai)  Duration  Apr 2016 – Jan 2018  Team Size  11  Project Description  Eximbilis is a basically Queue workflow system for trade finance system of ENBD(Emirates NBD). We providing the user group level task details and escalation matrix with defined SLA on customer basis, this workflow replaces the older thick client technology of STAFFWARE( Share Point) tool to a sophisticated web application which is IBM BPM . It includes alert and notifications to banking users when new tasks are about to be breached, for their SLA maintenance.  Contribution  - V Design, development, Unit and Regression testing and deployment.  Project Name  Account Opening and Card Maintenance Process  Cilent  Emirates National Bank of Dubai (Egypt)  Duration  Aug 2015 – Apr 2016 (Including Client Side Post Production Support)  Team Size  7  Project Description  The primary focus of the project is to automate the ENBD Egypt - Account Opening Cards and Loans.  Generic, Remittance, Exceptional Transactions and Cards Maintenance processes like Early Settlement Liability Letter Issuance, Clearance Letter Issuance, Clearance Letter Issuance using IBM BPM Suite. The BPM workflow will integrate with external ENBD application systems like Documents storage(DocSafe), Business rules (WODM), Anti-money laundering(SafeWatch) and Political exposed persons (World Check) using TIBCO(ESB).  Contribution  J Development and Designing.  Development, Unit and Regression testing and deployment.  J Design, development, Unit and Regression testing and deployment.
